uPVC Hoarding

The Sustainable Solution

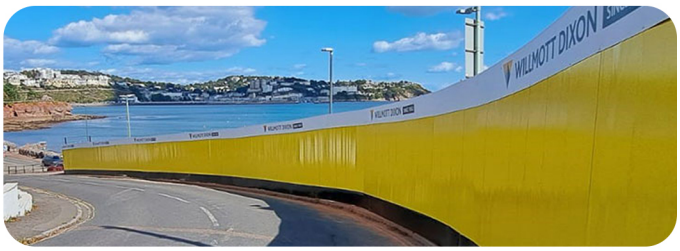

TOPAN
Perimeters | Fencing

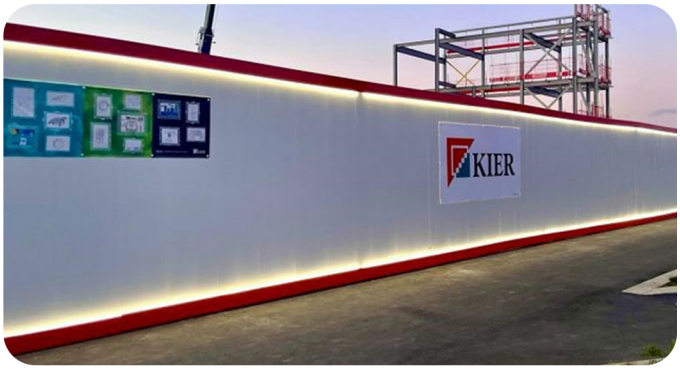

Topan's uPVC hoarding, manufactured from recycled materials and fully recyclable, offers a highly adaptable perimeter solution for all ground types and surfaces.

Featuring swift installation with kentledge and/ or dug-in systems, ensuring robust security and the benefit of a durable, low-maintenance option that supports your project, your environmental goals and your budget.

Topan delivers adaptable and truly sustainable site management.

Our uPVC hoarding system saves up to 15kg of CO2 per meter compared to timber

Benefits

Sustainability & Net-Zero	Manufactured from recycled uPVC and 100% recyclable to support your net-zero targets and enhance **BREEM** or **CCS** project scores.
Superior Durability	Tough, weather-resistant, and non-porous for a professional, clean site aesthetic. Eliminates the need for frequent maintenance and looks better than timber for longer.
Project Cost Efficiency	Reusable across multiple projects and features a modular design for rapid install/dismantle. This significantly reduces overall labour, material and disposal costs.
Regulatory Compliance	Engineered systems are designed for stability and fully adhere to the **Temporary Works Forum (TWF)** guidelines.

System

uPVC Panels	Technical Specifications
Recycled uPVC	Durable, impact-resistant recycled uPVC, contributing to sustainable construction practices.
Dimensions	2400mm x 500mm boards
Weight	6kg
Finish Options	Painted (standard RAL), vinyl graphics, anti-graffiti coating
Maintenance	Wash down/deep clean

Kentledge System	Technical Specifications
Structure	Precast concrete ballast blocks (with framework)
Dimensions	Between 900 and 1500mm
Weight	750, 950 and 1,250 kgs
Stacking Capabilities	Availability on ground and engineering study

Dug In	Technical Specifications
Structure	Timber posts (with framework)
Dimensions	2400mm x 275mm
Depth of Installation	Dependent on ground and engineering study 800 and 1200mm
Weather Resistant	Pressure-treated and water repellent coated posts to prevent rot and insect infestation

Other Accessories

- **Gates** (pedestrians and vehicles)
- **Corner pieces**
- **Infill panels**
- **Profiles**
- **Heras**
- **Barriers**
- **Permanent Fencing**
- **Water filled barriers**
- **Signage options/fixings/lighting**
- **Security topping (FST and Mesh)**
